## **TCA SUPPORTS FREIGHT WEEK 2013 AND THE 24TH AUSTRALIAN FREIGHT INDUSTRY AWARDS**

Transport Certification Australia (TCA) today announced it will be a key participant in Freight Week 2013, an event co-hosted by the Victorian Transport Association (VTA) and the Victorian Automobile Chamber of Commerce (VACC) running from 2-6 September 2013.

'TCA recognises the effort of the VTA and the VACC in organising this major event, which promises to generate discussion across a range of topics critical to the freight and logistics sectors,' said TCA Chief Executive Officer, Chris Koniditsiotis

'TCA will be prominent throughout the week, highlighting how the use of intelligent technologies can reshape the way we think about driving productivity and safety reforms.'

'The event will also provide attendees with the opportunity to meet key TCA personnel, who will be in attendance,' Mr Koniditsiotis said.

TCA's formal involvement during Freight Week 2013 is as follows:

Technology Highway – The Future of Freight  
*How can technology deliver safety, productivity and infrastructure benefits?*  
Chris Koniditsiotis – Chief Executive Officer  
Monday 2 September 2013 @ 11am

Technology Highway – The Future of Freight  
*How to track and trace, meet the regulations and drive within the law – solutions that work*  
Gavin Hill – General Manager, Strategic Development  
Monday 2 September 2013 @ 2pm

Trucks on Local Roads – Debating Community Issues  
*How Telematics is changing the way local governments manage their road networks*  
Gavin Hill – General Manager, Strategic Development  
Tuesday 3 September 2013 @ 2.20pm

Road Transport Trends – Safer, More Productive Transport  
*High productivity vehicles – what are they? And where can they go?*  
Chris Koniditsiotis – Chief Executive Officer  
Wednesday 4 September 2013 @ 8.45am

'TCA is also proud to be sponsoring the *Australian Transport and Logistics Technology Award* at the 24<sup>th</sup> Australian Freight Industry Awards, which is being held on the evening of 7 September,' Mr Koniditsiotis said.

The Award will identify the individual, group or organisation that has applied innovation/technology systems to their business to enhance productivity or solve a problem resulting in a positive outcome.

'TCA welcomes the opportunity to recognise – and indeed promote – technology-based innovations that can deliver real results in the transport and logistics sectors,' Mr Koniditsiotis said.
