Telematics Monitoring Application

An Application of the National Telematics Framework

What you need to know

Telematics Monitoring Application provides a flexible, cost effective approach to the management of heavy vehicle access using telematics.

It offers a lower level of assurance for lower risk activities, compared to the Intelligent Access Program (IAP) application.

Benefits of Telematics Monitoring Application

- It is a flexible, lower cost use of telematics to manage road access and compliance.
- Devices already fitted to vehicles may be used.
- Suitable for low to medium risk vehicles and transport activities and is lower cost and easy to use.

Important information about Telematics Monitoring Application

- Suitable to monitor lower risk road use activities.
- Requires a type-approved telematics In-Vehicle Unit (IVU) and a certified service provider.
- Telematics devices and services already in use by transport operators may be suitable, depending on the needs of road managers or regulators.

So I want to participate

Road managers or regulators will advise when you need Telematics Monitoring Application.

To participate, you will need to use:
1. A type-approved telematics In-Vehicle Unit (IVU)
2. A Certified Service Provider
3. Depending on the needs of road managers or regulators, telematics devices and services already in use by transport operators.
