Position title:	Senior Technical Business Analyst
Entity:	Austroads
Group:	Data & Technology
Job Type:	Full – time (1.0 FTE)
Location:	Austroads Sydney Offices
Reports to:	Head of Application Delivery
Responsible GM:	Chief Data & Technology Officer
Direct reports:	N/A
Date reviewed:	May 2024

Organisational Context

Austroads is the association of Australian and New Zealand transport agencies.

We provide authoritative, practical and impartial advice, information, tools and services to help our members to deliver safe, efficient and reliable mobility to their customers.

We also deliver value to a range of other key stakeholders across government, industry and communities, where there is a demonstrated societal benefit to do so.

Austroads comprises several business activities, including the core Austroads work program, the National Exchange of Vehicle and Driver Information System (NEVDIS), and Transport Certification Australia (TCA).

Our teams are located across Australia and New Zealand. We work in an integrated and collaborative way, along with external consultancies and other partners, to ensure our products and services are delivered successfully and maximise value.

Austroads promotes a culture of professionalism, innovation, and integrity, with a commitment to accountability, quality, and excellence in the delivery of all of our programs and services.

We recognise the unique skills and abilities of each individual, who come from a wide range of disciplines and backgrounds. We support our people through ongoing development and learning opportunities and create a supportive team environment for all our staff. We strive to be an employer of choice.

Austroads takes inclusion and diversity seriously. We embrace difference and diversity of identity, experience and thought, and actively strive for inclusive behaviours across our company and our work.

The Role

Team Purpose

The Data and Technology team focuses on harnessing the power of data and technology to support our member organisations to deliver an improved outcomes for roads and transport users.

Our mission is to enable data-driven decision-making, enhance operational efficiency, and create value for our stakeholders. We do this through the proactive development and implementation of contemporary D&T standards and systems.

Here are some key points that encapsulate our purpose:

1. **Data Stewardship:** We treat data as a valuable corporate asset. Our team aims to deliver its completeness, quality, security, and accessibility, allowing us to derive meaningful insights and drive informed actions.
2. **Technology Enablement:** We leverage state-of-the-art technologies; and we use the best systems for the task. Our goal is to empower our organization with scalable, reliable, and agile solutions.
3. **Cross-Functional Collaboration:** We collaborate closely with business units, ensuring alignment between data/technology strategies and organizational goals. By bridging the gap between technology and business, we drive holistic transformation.
4. **Innovation Hub:** Our group serves as an innovation hub, constantly exploring emerging trends and experimenting with novel solutions. We foster a culture of curiosity, experimentation, and continuous learning.

Remember, our Data and Technology team is not just about bits and bytes; it's about unlocking the full potential of data/technology to propel our organization forward.

Position Purpose

This position provides the support to the Head of Application Delivery and the broader team to ensure the successful completion of information technology projects and tasks to support the realisation of Austroads' business focus and strategic plans.

Major Responsibilities/ Accountabilities

The role is responsible for:

- Working within a team to perform high-level business analysis and develop high-level solutions, business cases and data models.
- Conducting detailed business analysis in collaboration with the team and stakeholders, including developing detailed requirement specifications and ensuring alignment with existing systems and strategy.
- Mentoring and providing guidance to other team members undertaking detailed business analysis.
- Providing effective testing services by creating test plans and test cases, conducting system testing, and resolving issues to ensure that all business and technical requirements are delivered.
- Developing and maintaining strong relationships with peers, external stakeholders and outsourced service providers to facilitate implementation of systems and enhancements.
- Providing project management services for applications development and operations (business-as-usual) projects.
- Ensuring quality assurance by applying procedures, analysing and resolving issues or gaps between business requirements and implemented solutions documentation in partnership with team members.
- Providing subject matter expertise and third-level support to the team and stakeholders to explain systems, resolve complex data/application issues and conduct data quality audits to maintain data integrity.
- Reviewing and providing input to projects, services, implementation plans, and strategy as required.
- Understanding, managing, and providing guidance in operations/applications configuration, data migration, change deployment and operational handovers.
- Conducting other tasks as directed.
