

Position Description

Position title: Senior Developer

Entity: Austroads

Group: Data and Technology

Job Type: Full-time (1.0 FTE)

Location: Austroads Sydney or Melbourne Offices

Reports to: Head of Application Delivery

Responsible GM: Chief Data and Technology Officer

Direct reports: N/A

Organisational Context

Austroads is the association of Australian and New Zealand transport agencies.

We provide authoritative, practical and impartial advice, information, tools and services to help our members to deliver safe, efficient and reliable mobility to their customers.

We also deliver value to a range of other key stakeholders across government, industry and communities, where there is a demonstrated societal benefit to do so.

Austroads comprises several business activities, including the core Austroads work program, the National Exchange of Vehicle and Driver Information System (NEVDIS), and Transport Certification Australia (TCA).

Our teams are located across Australia and New Zealand. We work in an integrated and collaborative way, along with external consultancies and other partners, to ensure our products and services are delivered successfully and maximise value.

Austroads promotes a culture of professionalism, innovation, and integrity, with a commitment to accountability, quality, and excellence in the delivery of all of our programs and services. Austroads values continuous improvement, and all staff are expected to engage in their work in a spirit of curiosity, collaboration, and proactivity.

We recognise the unique skills and abilities of each individual, who come from a wide range of disciplines and backgrounds. We support our people through ongoing development and learning opportunities and create a supportive team environment for all our staff. We strive to be an employer of choice.

Austroads takes inclusion and diversity seriously. We embrace difference and diversity of identity, experience and thought, and actively strive for inclusive behaviours across our company and our work.

The Role

Team Purpose

The Data and Technology team focuses on harnessing the power of data and technology to support our member organisations to deliver an improved outcomes for roads and transport users.

Our mission is to enable data-driven decision-making, enhance operational efficiency, and create value for our stakeholders. We do this through the proactive development and implementation of contemporary Data and Technology standards and systems.

Here are some key points that encapsulate our purpose:

- 1. Data Stewardship: We treat data as a valuable corporate asset. Our team aims to deliver its completeness, quality, security, and accessibility, allowing us to derive meaningful insights and drive informed actions.
- 2. Technology Enablement: We leverage state-of-the-art technologies; and we use the best systems for the task. Our goal is to empower our organization with scalable, reliable, and agile solutions.
- 3. Cross-Functional Collaboration: We collaborate closely with business units, ensuring alignment between data/technology strategies and organizational goals. By bridging the gap between technology and business, we drive holistic transformation.
- 4. Innovation Hub: Our group serves as an innovation hub, constantly exploring emerging trends and experimenting with novel solutions. We foster a culture of curiosity, experimentation, and continuous learning.

Remember, our Data and Technology team is not just about bits and bytes; it's about unlocking the full potential of data/technology to propel our organisation forward.

Position Purpose

This position will provide support to the Head of Applications Delivery and the broader team to ensure the successful completion of information technology projects and tasks to support the realisation of Austroads' business focus and strategic plans.
